FOR IMMEDIATE RELEASE

Help us Solarize Wellfleet!

In December, the town of Wellfleet was selected to participate in a special solar energy incentive program administered by the Massachusetts Clean Energy Center. **Solarize Wellfleet** (www.solarizewellfleet.org) offers home and business owners the opportunity to install solar panels at a reduced group rate along with other special incentives.

Two important informational events will highlight this program. The **“Solar 101” workshop on Monday, February 3, 7–9 p.m.** and **“Meet the Installer” on Saturday, February 22, 10 AM–Noon.** Both events will be held at the Wellfleet Senior Center.

The Solar 101 workshop on February 3 is an orientation led by Mass Clean Energy Center representatives who will discuss how solar photovoltaic systems work and what makes a good site. They’ll also explain the tiered pricing structure and the incentives available, including state and federal tax credits, rebates and tax deductions. This workshop is co-sponsored by the Wellfleet Community Forum.

Meet the Installer on February 22 is a chance to hear from the companies selected to perform the work.

They will talk about what to expect from a site inspection, custom system design, and the installation processes. There will be a question and answer period afterwards.

There will also be a demonstration of the Mapdwell Wellfleet Solar Map program, which allows you to find your property online, get an estimate of its solar potential and the estimated cost and payback period.

We hope you can attend one or both events. And to keep up with important dates in the coming months and for more about this program, go to the Solarize Wellfleet website at www.solarizewellfleet.org.

Hope to see you soon!
